

PRESCRIBED PEDIATRIC EXTENDED CARE (PPEC)

Special care for medically dependent children. A nurturing, less costly alternative to in-home nursing care.

When your child has unique medical needs requiring constant medical intervention and monitoring not provided by regular schools or daycares, it can be costly to hire in-home nursing care, and even more detrimental to abandon work or school to stay home and provide the needed attention. CSI offers the perfect solution with its Prescribed Pediatric Extended Care Centers (PPEC). One of the few caregiving companies in the state of Florida offering this much needed service, CSI is devoted to serving the needs of medically dependent children and their families.

CSI's PPEC centers are state licensed and regulated and offer nurturing, meticulously appointed daycare settings that are fully staffed by highly qualified pediatric medical personnel including pediatric nurses, licensed practical nurses, nursing assistants and occupational, physical and speech therapists. CSI's PPEC centers offer up to 12 hours of daily care for families struggling with the specific medical needs of children from birth to 21 years of age. Children attending CSI's PPECs have medical conditions ranging from respiratory problems, severe burns, cerebral palsy, and recovery from transplants. Qualifying children may include those with:

- Apnea Monitoring
- Tube Feedings
- Frequent Medication Administration
- Ventilator Management
- Oxygen Administration
- Tracheostomy Care
- IV Administration

As a less costly alternative to in-home nursing care, CSI's PPEC Centers allow parents the opportunity to return to work or school. They offer the added comfort of engaging children in a socially stimulating setting where their medical needs can be met and they can ultimately thrive.

CSI's PPEC Centers are open Monday through Friday (except holidays) from 6 am to 6 pm. In addition to medical intervention and attention, services include:

- Occupational Therapy
- Speech Therapy
- Developmental Planning and Interventions
- Socialization and Peer Stimulation
- Physical Therapy
- Transportation, if qualified
- Parent Support and Education

Service costs are 100% reimbursable by Medicaid, if eligible. Private Pay is also accepted.

CSI continues to grow in this very special underserved area and develop PPEC centers throughout Florida to care for the medically dependent children in local communities.
